Art Unit: 3744

This application contains claims directed to the following patentably distinct species: first species of damper of Figures 4-6 (butterfly), second species of damper of Figure 7 (plate-door) and, in the event either the first or the second species is elected pick one of each of the following, with or without spring bias (see specification, page 21, line 20), with or without air pressure actuation or with or without motor actuation (page 22, line 23 – page 23, line 12), third species of damper of Figures 9-12 and 16 and, if the third species is elected, pick one of the modifications of Figures 13a-13d, 14, 14a and 15, fourth species of Figure 17 and fifth species of Figure 20. The species are independent or distinct because they have mutually exclusive constructions that are difficult to search out in the limited time allotted for examination.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claim 1 appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3744

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
